The AI Risk Quick–Screen

A free triage tool from AI GOVERNANCE CHAIN™

Twelve questions. Five minutes. The result tells you which of the six AI risk categories expose you most, so you know where to start. Answer each Yes (1 point) or No (0). Score by category.

Abbreviations and Acronyms

No prior knowledge is assumed. Every acronym used in this document is defined below.

AI: Artificial Intelligence

EU: European Union

EU AI Act: the European Union Artificial Intelligence Act (Regulation (EU) 2024/1689)

Technical (Q1, Q2)

1. 1. Do you test your AI systems for accuracy and monitor for drift after deployment?
2. 2. Have you tested how your systems behave on unusual or adversarial inputs?

Data (Q3, Q4)

1. 3. Can you trace where your training and input data came from, and confirm you have the right to use it?
2. 4. Do you have controls protecting personal data used by or exposed to your AI?

Ethical and Societal (Q5, Q6)

1. 5. Have you tested your systems for biased or unfair outcomes across groups?
2. 6. Have you tested whether your systems flatter, agree, or fabricate rather than tell the truth?

Legal and Regulatory (Q7, Q8)

1. 7. Do you know which regulations (EU AI Act, sector rules) apply to each AI system you run?
2. 8. Do your user disclosures accurately describe what your AI does and decides?

Operational (Q9, Q10)

1. 9. Can a human meaningfully oversee and, if needed, stop each AI system quickly?
2. 10. Would you detect an AI failure through monitoring rather than through a complaint?

Strategic (Q11, Q12)

1. 11. Have you assessed the reputational and mission impact of a public AI failure?
2. 12. For any autonomous or agentic system, have you bounded what it is allowed to do without approval?

Reading your result

Score each category out of 2. Any category scoring 0 is a red zone, address it first. A category at 1 is a watch zone. A category at 2 is, for now, covered. Most organizations discover two or three red zones they had never named. That is the point: this screen converts a vague unease into a ranked, actionable list.

Where the free version stops

This screen ranks your categories. It does not score the thirty individual risks, build your register, plan treatment, or set the monitoring that keeps the picture current. That is the AI Risk Management Kit.

Your next step: Get the **AI Risk Management Kit, Full Edition** in the Execution Library (the instrument library's online storefront, section: The Core Governance Kits). Every instrument in the Execution Library is also included in the **Governance Vault**, the all-access annual licence.
